WELCOME ADDRESS

The future — everyone's future, including that of the earth — is dependent on the children we raise. At birth, a child's only truly identifying characteristic is that s/he is human. It is not their colour or country that should define their future.

How they are loved, and what they learn to value is their future – and ours, because this circle of life is a continuum, not a handing over to start anew. There is therefore nothing more important than the effort that is put into the care of the human child.

You are here to share wise words and expertise in this endeavour, and we welcome you with the wide open arms of the 'Mother City' Cape Town.

*Helen Zille
Premier of the Western Cape, South Africa*

WELCOME ADDRESS

Dear Delegates

We are delighted that you have come to the first Congress of the World Association for Infant Mental Health to be held on African soil. We trust that you will find the programme, both the academic, formal part as well as the social section, stimulating and refreshing.

We have chosen the topic of “Babies in Mind – the Mind of Babies: a View from Africa” as a way to bridge the different areas of interest and expertise that exist in our field. The interplay between the environment and what the baby brings to it with its abilities, its readiness to take in the world is what is so new and exciting for us all. The mind of the caregiver embodies the context – culturally, socially and emotionally – into which the infant is embedded.

This is our meeting point and we are hoping that South

Africa, with its diversity and social challenges will provide the platform from where fruitful exchanges can take place.

Contributions from the four corners of the world will bring you the latest findings in research and clinical practice. Plenary speakers include Professor Arnold Sameroff and Dr Neil Boris from the USA, and Professor Linda Richter, Professor Astrid Berg and Professor Mark Tomlinson from South Africa. Professor Olayinka Omigbodun and Professor Pumla Gobodo-Madikizela will also provide important insights from within South Africa and the African continent. The congress programme will be a rich one that caters for all needs with 67 symposia, 58 workshops, 18 clinical teach-ins, 8 video presentations, 150 posters and 13 poster workshops from 49 countries throughout the world.

We also have an art exhibition to cater to the other senses – “It takes a village to raise a child and a child to raise a village” – will showcase Africa in its rich diversity. The strength of WAIMH has always been how clinicians, researchers, policy makers can all find a ‘home’ in WAIMH. The programme in Cape Town will be no different. An infant’s world is affected by a multitude of miniscule and mighty factors; culture and Zeitgeist, together with many others, inform the contours of their landscapes. The small multi-media exhibition has in mind contextual factors that impact on both the mother and the child’s experience of the world. Consisting of paintings, photographs, pottery and a short video-

clip, the exhibition provides a reflective space in the bustle of the Congress. The social programme has been built in such a way as to enable you to get a taste of what it is like to be in South Africa. From a more gentle beginning at the opening ceremony, with a girls' choir and a presentation by Pumla Gobodo-Madikizela that is bound to be powerful and moving, to an experience with drumming – a traditional way of communicating in Africa; to an event hosted in Nyanga, one of the townships, to the Congress Dinner with African food and entertainment. The closing ceremony will leave you with the vibrancy and rhythm that is so much part of the African soul.

For those who are not directly participating in the Congress there is a wealth of sights and activities to enjoy. There is a tour desk at the Congress venue where you can make enquiries and arrangements for visits in the various places of natural beauty, historical interest and just pure fun and relaxation – such as our beaches which have particular beauty.

We wish you a wonderful week and hope that you will have many good memories and experiences here on the tip of Africa.

WELCOME ADDRESS

Cape Town, Africa!

It takes a village to raise a child (African saying)

Our WAIMH congress will take place in Cape Town, South Africa: it was about time that WAIMH would go to Africa for a world congress. It is also timely and adequate that we should meet in South Africa. South Africa is a multiethnic, lively and active society, with a great history and a specific culture. As is the case with all modern cultures, South Africa is faced with finding solutions to seemingly intractable societal problems, including violence, the affects of enculturation and of world globalization, economic crisis, rapid societal changes, poverty and of ghettoisation. But South Africa has made an extraordinary move into democracy, going out of apartheid and is still in a process of reunification. Few of us, ten or fifteen years ago would have thought this country could achieve such a move with such a success.

Infants are always in the middle of trouble, because of the negative effects of civil wars and crisis on caregiving, several factors of mental health, nutrition, access to care and on prevention. Cape Town will definitely be a good and a safe place for us to meet and work on ways to keep babies in mind in difficult, tense times, and to work on what is going on in babies 's mind, and on the way to improve the presence the needs and the rights of the babies in our mind. We will meet on the waterfront, where President Mandela left for his 27 years in prison, and where he landed, free and ready to be the first black president of South Africa.

It is also timely that we have our first world congress after implementing the major changes in our bylaws in Africa. Implemented in Leipzig, those changes have and will continue to bring more input from the affiliate associations. The South African WAIMH affiliates are very active, with prominent figures and with a lot of creative clinical work and very good science to improve mental health of infants and of caregivers. This congress will put a major emphasis on training issues, and on ways to share and learn intervention and prevention programs. We hope that this congress will be an opportunity for the African Mental Health Community to come and gather and discuss these issues, as well as a village market place to meet with people, to share ideas, stories, concepts, tools and experiences. The Local Organizing Committee, led by Astrid Berg and by Mark Tomlinson and the Executive Committee will make every effort to help African professionals from South Africa and from the continent to attend the congress. The Program committee led by Kai von Klitzing, with Mark Tomlinson (South Africa), Kaija Puura (Finland) and Neil Boris (USA) is cooking us a program with high level interventions and teaching opportunities.

Looking forward to meet, work and share with you in Cape Town, 2012.

*Antoine Guedeney, MD
WAIMH president (2008-2012)*

WELCOME ADDRESS

An invitation from the Program Committee

The World Association for Infant Mental Health is becoming global. After having held its world congresses in North America, Europe, Australia and Asia, it now moves to Africa. This is an important step because Africa is a continent in which infancy really matters. Poverty, wars, HIV and racial discrimination are all factors which dramatically impede healthy growth and development. At the same time our colleagues from South Africa report on a robustness in infants and young children of this Continent. While it is so essential to advocate for the rights of infants and families to live and grow under healthy conditions, we may also learn about what it is that enables children to show resilience despite not always having ideal circumstances. Going to Cape Town is a symbol of hope. Twenty years ago when I attended my first World congresses on infant mental health, it would have been unthinkable to organize such an event in a country tortured and agonized by an inhuman apartheid regime. Now once again – after Leipzig in 2010 – our world congress will be hosted by a city in which there has been dramatic but peaceful political change over the last 20 years. Of course, such change also generates uncertainties and anxiety in family lives. But the dawn of political freedom and human rights is the basis for all improvement in the lives of infants.

Babies in mind – the minds of babies: The motto of the congress takes up an old WAIMH tradition. We are interested not only in behaviour and observable interaction, but also in the development of minds, in infants as well as parents. The theories of two of our founding fathers come to my mind: Michel Soulé and his “l’enfant dans la tête” as well as Serge Lebovici and his “bébé phantasmatique”. Both made it absolutely clear that it is essential, scientifically as well as clinically, to reflect on the outer as well as the inner worlds of infants and parents. The Cape Town congress will be an opportunity to broaden our understanding and to draw our attention to the view from Africa.

The members of our Program Committee are striving to combine international scientific knowledge with clinical experience, theoretical thinking, and cultural views to build a stimulating congress program. Cape Town will be a great place to meet.

I look forward to seeing you in South Africa.

Sincerely

Kai von Klitzing

*Professor of Child and Adolescent Psychiatry, University of Leipzig
Chair of the Program Committee*

WELCOME ADDRESS

Dear Delegates

On behalf of the Western Cape Association of Infant Mental Health (WCAIMH) I would like to welcome both local and international delegates to the WAIMH congress in Cape Town. We are honored and delighted to be hosting this international conference on our own soil. It is a privilege to be given the opportunity to learn from and share expertise with colleagues from around South Africa and from abroad. We hope that our international guests will find it interesting to hear about the challenges facing infants and their families in South Africa, and the important work that is being done here by various individuals and organizations.

At this conference, we have the valuable opportunity to exchange knowledge between developed countries - where infant mental health is more established and resourced - and Africa - where the infant mental health needs are profound but the resources are minimal. We hope that this meeting of minds during the conference is going to enrich the clinicians and researchers from both sides of the socio-economic continuum and that this in turn will benefit the lives and improve the future of infants-at-risk all over the world.

Here in Cape Town our very active and dedicated branch of WAIMH has been meeting once a month at the Division of Child and Adolescent Psychiatry for the past 17 years. As a delegate at this conference you are most welcome to attend these meetings if and when you are visiting our city. The members of WCAIMH are professionals – with a special interest in infant mental health - from a range of different health disciplines, including psychiatrists, psychologists, social workers, physiotherapists, occupational therapists, nursing sisters, chiropractors, researchers and medical doctors. We are pleased to have the unique opportunity at this conference to expand our own knowledge and expertise in relation to our work with infants and their families.

Jenny Perkel
Clinical Psychologist and Chairperson of WCAIMH

GUIDELINES FOR PRESENTERS

WAIMH 13th World Congress, 17-21 April, 2012, Cape Town, South Africa

Congress Language: English

1. General important information for speakers

Projection Technique

Data projection & video projection (digital video) is provided in all main rooms. Video projection (VHS player) is only on request. Please notify the technician where you are scheduled to present in a day before your presentation about your request. Photographic slides cannot be shown.

Preparation

Only talks saved on a data medium, a USB stick or CD-ROM will be accepted. It is always advisable to bring a spare USB drive with your presentation on. All versions of Powerpoint will be accepted including the latest version 10 for Windows or Mac. After saving your presentation try opening it on another computer as a security measure. For videos the Version 9 of WMV video format is preferred. Only with these formats is a timely and functional presentation secured.

The speakers preview room is located at Meeting Suite 1.92 and is signposted accordingly. Each speaker can review his or her talk again there on the computer system and still make changes if necessary. Our technicians will be more than pleased to help you. **In the congress center it is not possible to use your own laptops.**

Each presenter needs to load his or her talk to the computer in the assigned conference room in the tea/lunch breaks before they are scheduled to present. There will be a technician to assist with this in each room. Please use a filename which corresponds to the day, room number and surname. This helps the technician when loading the presentations Eg: wed2.43 wilken.ppt

All videos together with the actual presentation must be in a folder. The video must then be imbedded into the Powerpoint presentation. The presenters can review their video in the room that they are presenting in during the tea/lunch break before they are scheduled to present. There will be a technician to assist with this in each room.

We request all speakers to strictly follow these instructions in order to ensure minimum possible disruption to the congress.

Should you have any questions, please do not hesitate to contact the preview room or the hostesses of the registration desk at any time.

For all questions before the conference,
please contact Mr Mohamed Jaffer onscreen@iafrica.com

GUIDELINES FOR PRESENTERS

2. Guidelines for presentation categories

Clinical Teach-in

The goal of a teach-in is to review experience and knowledge about clinical experience/cases. Teach-ins are scheduled for 45 or 90 minutes.

Please note that if you are presenting in a 45 minute teach-in, there are always two 45 minute sessions following each other in the same room. Please be courteous and take care that you do not exceed your own session time.

Workshop

Workshops are designed to exchange information about a particular body of knowledge, clinical treatment, teaching technique, assessment or research instrument, or methodology. A workshop should include a small number of presenters (generally no more than two) and the emphasis should be on disseminating specific knowledge. Because workshops are tutorial in nature, active discussion between audience and presenters should take place throughout the session. Workshops are scheduled 45 or 90 minutes.

Please note that if you are presenting in a 45 min workshop, there are always two 45 minute sessions following each other in the same room. Please be courteous and take care that you do not exceed your own session time.

Symposium

Symposia are scheduled for 45 or 90 minutes, including 2-4 oral presentations on a related topic (clinical issue, research finding, policy issue) and time for active discussion with the audience.

Presenters of a symposium need to communicate with each other on the length of individual presentations and tell the chair persons or moderators how the symposium is structured. Chair persons or moderators are urged to ensure that the length of the talk is strictly complied with, as is the course of the program.

Please note that if you are presenting in a 45 min Symposium, there will always be two 45 minute presentations following each other in the same room without a break. Please be courteous and take care that you do not exceed your own session time.

GUIDELINES FOR PRESENTERS

Video Presentation

Video presentations are used to demonstrate or teach about new clinical or research evaluation tools and methods. These presentations run once during the time of parallel sessions, and are restricted to 45 minutes. Presenters must be available at the scheduled time. Please note that there will always be two 45 minute presentations following each other in the same room without a break. Please be courteous and take care that you do not exceed your own presentation time.

The format WMV is playable on the DVD device on PCs, and is preferred. Special video formats have to be approved well in advance of the congress (please contact Mr Mohamed Jaffer onscreen@iafrica.com).

Poster

Poster presentations will be exhibited in the congress center at Jasminum restaurant in from Wednesday, April 18th to Saturday, April 21st.

Mounting time is daily from 08:00a.m. to 10:00a.m.

Posters must be dismounted daily between 4:45p.m. and 6:45p.m. at the latest (Saturday, July 3rd until 3 p.m.) at the latest).

Posters are displayed for a day. The author(s) must be present at the poster at 12:15a.m. to 01:15p. m. in order to discuss the poster with participants.

The size of your poster should not exceed 120 cm / 47.24 inch (height) and 90 cm / 35.43 inch (width).

Adhesive double sided tape will be provided on-site to fix the posters on the poster boards..

Please note that we cannot guarantee to preserve your poster after dismounting time.

GUIDELINES FOR PRESENTERS

Poster Workshop

Poster Workshops are scheduled for 90 minutes. Posters for poster workshops have to be fixed on the boards in the Auditorium 2 Upper Foyer or in the Meeting Room 2.41-42 before the beginning of the session and have to be dismantled immediately after the poster workshop.

While the workshop facilitator has some flexibility in managing the timing of sections, each workshop will consist of 5 parts.

Introduction and Orientation (~5 minutes): At the outset of the session, the predetermined workshop facilitator will review the goals and give a basic overview of the timing of the workshop. He or she may comment on the theme of the workshop (e.g., what ties the group of posters together).

Poster Viewing (~40 minutes): During this phase of the workshop, attendees are encouraged to circulate among the posters. Presenters should be at their poster to answer questions and briefly discuss findings with attendees (much like a standard poster session). The facilitator will also circulate and meet with presenters.

Group Discussion (~20 minutes): The facilitator will call upon presenters to speak to aspects of their work and/or present an overview of the main points of the poster. Given the average number of posters per session these comments will need to be brief and presenters are encouraged to prepare 3-5 minutes worth of comments ahead of time.

Question and Answer (~20 minutes): Attendees will have the chance to ask questions and/or comment on the posters. The facilitator will coordinate the Q&A section.

Wrap-up (~5 minutes): The facilitator makes closing comments. Presenters are encouraged to bring abstracts or 1-page "copies" of their posters for attendees.

PLACES OF INTEREST

TOP TOURIST ATTRACTIONS

Cape Town has so much to offer as a tourist destination. It is blessed to have South Africa's top six tourist attractions within one hour's drive from the city centre, the Victoria and Alfred Waterfront, Table Mountain, Cape Point, the Cape Winelands, Kirstenbosch Botanical Gardens and Robben Island, a short boat trip away.

Table Mountain

South Africa's world-renowned icon, Table Mountain, was afforded National Park status in May 1998. Table Mountain offers something for everyone – magnificent views, cable car rides, mountain-biking, hiking, serious rock climbing, cross country running, fascinating botany, birding and for the more adventurous, abseiling and paragliding. Visitors are treated to a spectacular view during the ride to the top of Table Mountain aboard a modern cable car with a revolving floor.

Victoria & Alfred Waterfront

Cape Town's Victoria and Alfred Waterfront has established itself as a leading world-class waterfront. The unique working harbour with scenic views of Table Mountain combined with entertainment options like shopping, street musicians, museums, an aquarium, boat trips and cinemas promise to make any visit an unforgettable experience.

*To book any tours/excursions, please contact
Robin Troup – Tel. +27 82 657 3443 / Email. wildsafari@worldonline.co.za,
Or see him at the travel desk at the Congress*

PLACES OF INTEREST

Robben Island

Robben Island is one of South Africa's four World Heritage sites. This barren windswept island was the prison home of former President Nelson Mandela for 18 years. Here you can experience the view that kept Nelson Mandela's dream of freedom for his country alive.

Winelands/Wine Routes

South Africa and the Western Cape produce some of the world's best wines. The first wines in South Africa were produced at Steenberg in 1695 and Groot Constantia is the oldest productive wine estate in the country situated within the city of Cape Town.

Kirstenbosch Botanical Gardens

Kirstenbosch is internationally acclaimed as one of the great botanical gardens of the world. Situated on the south eastern slopes of Cape Town's magnificent Table Mountain, the estate covers 528 hectares and includes a cultivated garden and a nature reserve. Indeed the tiny Cape Peninsula has more floral diversity than the whole of Europe combined.

Cape Point

The Cape of Good Hope and Cape Point form part of the Cape Peninsula National Park and are managed by South African National Parks. Visitors can enjoy the 7 750 hectares reserve of indigenous flora and fauna and over 150 bird species and can also travel with the only funicular in Africa to the viewing platform 678 metres above the sea.

TRANSPORTATION

Airport Transfers

Please contact Robin Troup – Tel. +27 82 657 3443 /
Email. wildsafari@worldonline.co.za
Or see him at the travel desk at the Congress.

By Taxi or Coach

Luxury air-conditioned coaches and shuttle buses will move delegates between the airport, hotels, the CTICC and their functions. Metered taxis are also available.

By Train

Cape Town station is situated within walking distance of the Westin Grand Hotel, and the functional Metro Rail system connects the city centre with the northern suburbs, southern suburbs and Cape Flats.

By Bus

The new Integrated Rapid Transit (IRT) System offers international visitors a scheduled bus service between the city centre, the airport, and select suburbs in Cape Town. By consolidating existing rail, bus, minibus and metered taxi services, the IRT will provide an efficient and robust transport network. The first phase of transformative development will focus on offering a safe high-quality bus-based (Bus Rapid Transit) system that delivers fast, comfortable, and cost effective urban mobility in the city centre with competitive prices. CCTV surveillance cameras and security personnel are available to ensure commuter's safety and security is prioritised. Infrastructure is wheelchair friendly. A staggered development will see the completion of the network in 2018, an initiative that will dramatically improve customer experience.

MyCiTi bus service

The MyCiTi airport-to-city service runs between the newly completed Cape Town International Airport and the Civic Centre bus stations via the N2 and Eastern Boulevard. This service will operate between 20 and 24 hours a day at a cost of R50,00 one way. It will depart every six to 30 minutes, depending on demand. The MyCiTi inner-city bus service provides convenient transport to hotels, accommodation nodes, restaurants, entertainment areas, parking areas, and places of interest. Each journey costs R8,00 and buses depart every 10 to 30 minutes and operate between 20 and 24 hours a day. See more information on: <http://www.capetown.gov.za/en/MyCiti/Pages/default.aspx>

TRANSPORTATION

Hop on Hop Off Tours

This service visits the major attractions around the city and is a convenient way to experience Cape Town's many varied attractions. The bright red "Hop-on Hop-off" city sightseeing service comes complete with nine multilingual commentary channels, plus a "kiddie's" channel and is an ideal and convenient method of travelling to and viewing the most popular attractions in and around Cape Town. Tickets can be bought on board the bus or online by visiting www.citysightseeing.co.za or from the Cape Town Tourism Visitor Information Centre in Burg Street.

Bus charters

Should a tourist group want to visit any area that is not on a normal bus route, a bus or coach may be chartered to drive the group to and from the destination. This should be planned well in advance and information is available from www.satsa.com

SOCIAL FUNCTIONS PROGRAMME

Welcome Function

Venue: CTICC Exhibition area

Date: Tues 17 April 2012

Time: 19h00

Marimba Band Entertainment:

amaAmbush is an African Music company based in Cape Town, specialising in the African Marimba. Our award-winning professional bands perform constantly around South Africa and overseas, and we also provide marimba tuition to over 500 students around the Cape. amaAmbush employs over 45 musicians and teachers who have been trained by amaAmbush. We also run a factory in District Six where we manufacture high quality instruments.

Drumming session

Venue: CTICC Auditorium 2

Date: Wed 18 April 2012

Time: 19h00-20h00

amaAmbush Drumming Workshops

The Drumming Workshops are great fun and are perfect for teambuilding. The facilitators demonstrate various traditional rhythms and people of all ages join in using various call and response techniques on the djembes. The drum circle creates a sense of unity within a group. The drumming workshop is up to 45mins in duration and amaAmbush supplies African djembes for each participant.

SOCIAL FUNCTIONS PROGRAMME

Cultural evening in Nyanga Arts Centre

Date: Thurs 19 April
Time: 19h30

Ticket: If you booked for the Nyanga Cultural Evening, your ticket will be in your name badge pouch.

Unfortunately the Cultural Evening is fully booked, so we will not accept any bookings at the Congress.

Buses will depart to Nyanga at 19h00 from the Cape Town International Centre in Coen Steytler Avenue. Please have your ticket ready when embarking the bus.

The Cultural Evening includes African cuisine and entertainment in Nyanga Township.

Congress Dinner

Venue: Moyo, Spier Estate, Stellenbosch

Date: Fri 20 April
Time: 19h30

Ticket: If you booked for the Congress Dinner, your ticket will be in your name badge pouch. If you would like to book for the Congress Dinner, please see Jolandi Ackermann at the registration Desk before lunch on Tuesday 17 April. If you booked transport to the Congress Dinner, this will be indicated on your Dinner ticket.

Buses will depart to Moyo restaurant at 18h45 from the Cape Town International Centre in Coen Steytler Avenue. The Moyo restaurant is situated on a wine farm, outside the town of Stellenbosch. Buses will drive you to your destination where you will find a magical world, away from the city: the restaurant is housed in a huge tent, artfully lit. Food from various parts of Africa is served as a buffet. The hospitality and entertainment is in typically warm, enthusiastic African style – you will experience an unforgettable evening with the rhythm and joy of this Continent staying with you for a long time.

SOCIAL FUNCTIONS PROGRAMME

ART EXHIBITION

Clivia Hall

Daily 9:00-18:00

It takes a Village to raise a child.

An infant's world is affected by a multitude of miniscule and mighty factors; culture and Zeitgeist, together with many others, inform the contours of their landscapes. The small multi-media exhibition has in mind contextual factors that impact on both the mother and the child's experience of the world. Consisting of paintings, photographs, pottery and a short video-clip, the exhibition provides a reflective space in the bustle of the congress.

Convened by: Jeanine Beukes.

CAPE TOWN GENERAL INFORMATION

Population

- The Western Cape holds a population of 5.2 million

Climate

- The Cape boasts typical Mediterranean climate – warm summers and mild and cool wet winters.
- Summer temperatures range between 15 °C (59 °F) and 27 °C (80.6 °F)
- Winter temperature ranges between 7 °C (44.6 °F) at night and 18 °C (64.4 °F) by day.

Water

- The regions superior water supply infrastructure guarantees some of the best water in the world

Time

- South African Time is set at GMT +2.
- There are no time zone differences within South Africa and there is no daylight saving system in summer.

Language

- English is widely spoken and understood.
- Most South Africans are bilingual; Afrikaans and Xhosa are two official languages most spoken in the Western Cape

Visas

- Visas are issued by the South African missions abroad and must be affixed in the applicant's passport before departing for South Africa.
- Visas are not issued on arrival at South African ports on entry. Many nationalities do not require a visa to enter South Africa, it is best to check with your travel agents if this is enquired.

- Monday to Sunday typically open between 9:00 – 17:30

Medical Issues

Medical Organisation and control

The Medi-Clinic at the CTICC has a registered nurse on duty during operating hours. There are two private emergency units within 5 minutes of the CTICC offering emergency medical care, i.e. Chris Barnard Netcare and Cape Town Medi-Clinic. Cape Town CBD is served by METRO EMS ambulance service and three private ambulance services. They are Netcare 911, er24 and Life.

CAPE TOWN GENERAL INFORMATION

First aid facilities for attendees

Visitors to the CTICC can rest assured that our on-site Medi-Clinic is equipped to provide first-rate medical assistance to anyone who may require it.

Additional medical facilities in the city

The city is served by two state run level one trauma centres (Groote Schuur Hospital and Tygerberg Hospital). There are also 9 regional emergency centres in the city - the closest to the CTICC being New Somerset Hospital which has a 24 hour emergency centre run by qualified Emergency Physicians.

Communicable and tropical diseases management

Cape Town has no risk of tropical diseases. It is not a malaria area. In early 2010 a measles outbreak was identified in South Africa. The number of new cases diagnosed in Cape Town in the last few months is minimal. A national immunisation rollout for children under 16 is underway. There are no current vaccine recommendations for the general public (adults) and tourists.

Hygiene and environmental issues

Cape Town is a modern city with clean drinkable tap water.

Your Host City: A Safe City

Despite perceptions to the contrary, Cape Town is as safe as most international cities, and this is in no small measure due to the efforts of the Central City Improvement District (CCID). One of the main drivers behind the establishment of the CCID in 2000 was to make Cape Town's Central City the safest in the country. The vision was to set up effective preventive and reactive security measures through highly visible police officers, mobile vehicles and a bicycle squad twenty four hours a day. This public/private partnership collects more than R27 million a year from property owners in the city, half of which pays for extra security on the streets of Cape Town's CBD. Altogether, 200 security officers keep the streets of the CBD safe, day and night, for all those who work in, live in or visit the city. The dedicated team of security managers and foot officers, who are highly visible, patrol the streets on a 24-hour basis. All officers are fluent in English. The other languages spoken are Afrikaans and Xhosa.

CAPE TOWN GENERAL INFORMATION

A CCTV surveillance network, paid for by the City of Cape Town, assists in keeping crime at bay. In addition, Cape Town now also boasts a municipal police force. Three hundred and fifty officers have already been trained, 35 of whom are allocated to the central city specifically.

CCID security officers work in a close partnership with the private sector and all law enforcement agencies by communicating on a daily, weekly and monthly basis. The CCID officers work regularly with the SAPS in special operations related to illegal activities in problem buildings, illegal trading, fraud, drug trafficking and prostitution. This unique partnership has seen a consistent decrease in the crime rate – and to date, since 2000, the CBD has experienced an astounding 85 percent decrease in crime. A mobile Safety Kiosk, set up last year by the CCID Security Department, which provides visible security in a range of locations, has made a huge contribution to security in the city.

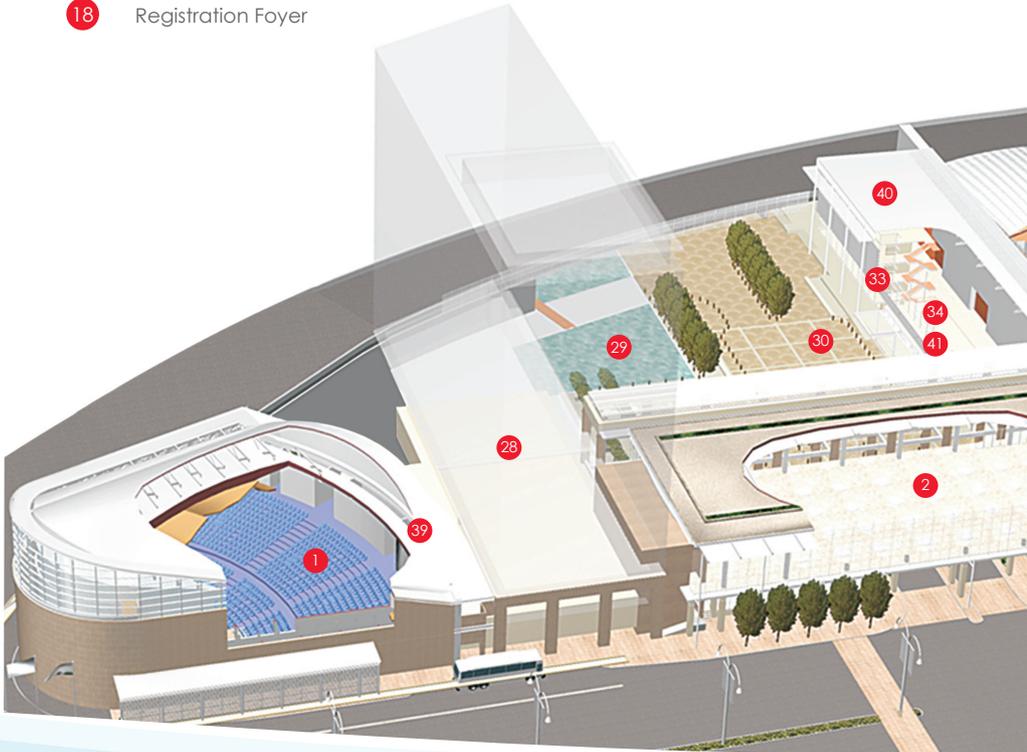

The kiosk provides visible policing in key locations, events, hotspot areas and problematic locations. The CCID Security Department is expanding the Safety Kiosk programme, with a second kiosk expected shortly and a planned expansion to five kiosks by June this year.
