16th Deleuze & Guattari Camp and Conference NL2024 - Intelligence, Instituting and Archiving

The 16th International Deleuze and Guattari Studies Camp and Conference focuses on the processes of subjectification. This has been a longstanding concern of Deleuze and Guattari since their ground-breaking work, *Anti-Oedipus* (1972), which provides a tripartite theory of the production of subjectivity. Guattari further developed a schizoanalytic approach to social formations, extending *Anti-Oedipus's* three syntheses into a more general account of three broader ecologies that are differentially enacted by environmental, social, and mental technics. Today, these ecologies can no longer be addressed in isolation by the sciences, humanities, and arts. Fifty years since *Anti-Oedipus*, this line of transversal thinking seems more pertinent than ever for thinking through becomings and subjectivation processes in the milieu of digital media ecologies, the changing techno- and noospheres engendered by hyperautomation, algorithmic governance, and increasingly systemic forms of disempowerment.

Structured along the three interdependent syntheses and ecologies, the conference focuses on three socio-techno-environmental regimes of madness: Intelligence, Instituting, and Archiving. Its goal is to revisit the material-discursive ecologies of instituting and archiving practices as critical and creative endeavours that may counter systemic stupidity and engender collective intelligence. Instead of pondering the question of what intelligence is, the event will address the pragmatics of how it happens, who institutes it, and through which technologies it is archived. Starting from (post-)Deleuzo-Guattarian concepts and methods, extended through feminist, queer, and decolonial critiques, the aim is to render visible the reciprocally determinant structure and operation of these three regimes and through what methods, modes, techniques, and technologies dis/individuating becomings come to be differentially enacted.

The aim is to promote original approaches to transdisciplinarity that break with the long anti-intellectualist tradition inherent in specialisation, professionalisation, and the fragmentation of knowledge. In this spirit, the conference will also embrace other types of affective, asignifying, spatial contributions, including images/graphics/videos, sound installations, and performances.
