18
19
20
21
22
23
24

The research intends to demonstrate the power of social media networks, namely Instagram, in building brand communities and co-creating value for brands. By analysing the 2015 campaign #withoutshoes by TOMS, the authors intend to demonstrate how the value creation process can be extended to involve all stakeholders and raise the effectiveness of a brand's communication campaign.

25

28
29
30
31
32
33
34

A qualitative approach was taken to enable an understanding of online consumer behavior. A series of qualitative semi-structured interviews were conducted with retail and marketing professionals from the TOMS brand to explore brand strategy. The TOMS Instagram account was ~~analyzed~~ analysed for a specific marketing communications event and summative content analysis was applied to the brand's Instagram profile in order to allow for an in-depth exploration of the co-creation process.

60

Through a detailed overview of the campaign developed by TOMS, this paper explores how TOMS fosters the formation of consumer-brand-relationships as well as maps out the advantages of value co-creation. The research findings support the literature on co-creation, which argues that the way to achieve innovation and value creation in the changing and challenging marketing landscape is through co-creation. This study adds to the findings that co-creation strategies are a privileged manner of nurturing customer relationships and of lowering costs for marketing and research and development (Sawhney et al, 2005; Prandelli et al, 2006).

Originality/value

There are a relatively limited number of studies focusing on the Instagram platform, and of those carried out thus far most concentrate on how the platform interprets cultural issues, rather than how it can be used effectively as a marketing strategy and how it can leverage user's preferences.

Also, not a lot of studies have focused on the relationship between value co-creation and its relevance and impact on brands through engagement processes and the role of experience in brand building. Brand value co-creation through human experiences can provide considerable implications for brand management (Prahalad and Ramaswamy, 2004a) as well as [being](#) a key component in the building process of customer experiences.

This study suggests new approaches to getting useful insights about how brands can use social media to further engage with their target audience through an integrative framework of brand value co-creation with theoretical underpinning.

INTRODUCTION

The concept of brand has suffered changes and evolutions over the past century. It has evolved from a way of allowing consumers to identify and recognize a company's offerings to an entity with high influence power over customer's values and actions (Keller and Lehmann, 2006). Brands are also credited to represent knowledge (Keller, 2003), enhance customer relationships and community building (Fournier, 1998; Muniz and O'Guinn, 2001).

The brand management process has suffered from growing disruptions in the market, mainly propelled by the introduction of social media networks as an additional touch point. This effective medium for collaborative communication has altered the way interaction works between businesses and the consumers (Dahan and Hauser, 2002). It has also enhanced the ability to integrate consumers in the day-to-day activities of the brand, allowing them to be heard and have a say in how customer value is created and in what they'd like to consume. (Bhalla, 2011).

Such platforms facilitate conversation and interaction between brands and consumers and allows an exchange between the physical and digital world of the brand (Nambisan and Baron, 2007) as well as new possibilities for product development, innovative delivery systems and a distinctive supplier network, amongst others. In sum, a whole new array of possibilities that changed the traditional way of doing business (Denning, 2014). This economic change was described by Shaughnessy (2014:17) as a "a complex transformation in human behaviour produced by a new way to satisfy consumption needs".

This shift in practice means that businesses need to go beyond conventional management skills and embrace a new and innovative type of management, with different goals, different ways of organizing and coordinating work and different values and ways of communicating. (Denning, 2013).

An effective use of social media channels looks at it presents itself as an alternative new channel route for collaboration and innovation and as unique touch points to engage communities, start conversations, recruit employees and develop new and innovative ideas. Successful brands have been using these possibilities to engage with their

3
4
5
6
7 ~~communities-followers~~ as well as asking them to participate in brainstorming and support
8 ~~of~~ the values and issues of that same community.

9
10 This shift is due to the fact that consumers are increasingly interested in brand stories and
11 in being part of a dynamic relationship and full immersion with the brands they relate to.
12 This dynamic relationship between brands and consumers is of growing importance to
13 fashion and allows for co-creation to happen in the brand identity process (Muniz and
14 O'Guinn, 2001).

15
16
17
18 ~~According to Bogoviyeva (2011, p. 371) c~~Co-creation has been defined as a
19 “collaborative activity in which customers actively contribute to the creation of brand
20 identity and image as well as ideas, information, product, service and experience offered
21 under a particular brand” ~~“(Bogoviyeva, 2011, p. 371).~~

22
23
24 According to Ramaswamy and Gouillart (2010) the key purpose of co-creation is to
25 engage consumers to create valuable experiences together as well as enhance network
26 economics. The core principles around this discipline are: experience mind-set, context of
27 interaction, engagement platforms and network relationships (Ramaswamy and Gouillart,
28 2010, p. 36). Brands encourage customers to forward messages to their followers (Van
29 der Lans et al. 2010) thus benefiting from referrals among consumers (Porter and Golan,
30 2006).

31
32
33
34
35
36 The increasing role of social networks in influencing perceptions about a brand and its
37 products was noted by Dee et al. (2007) through empowering participants as well as
38 creating and maintaining engaging discussions. The authors discuss how constant and
39 motivating behavior helps to reinforce consumer to brand relationships and ultimately
40 leads to increased brand loyalty.

41
42
43 The benefits to building loyal consumers include willingness to pay more for products as
44 well as ~~recommend-recommending them~~ to other potential customers (Gee, ~~et al., Coates,~~
45 ~~& Nicholson~~, 2008), ~~thus helping. It also helps~~ brands achieve a real competitive
46 advantage (Bharadwaj ~~et al., Varadarajan, & Fahy~~, 1993).

47
48
49 Co-creation approaches to brands have dominated the literature ~~on-in~~ recent years, from
50 the brand building process (Ind ~~& and~~ Coates, 2013) to designing brand relationship
51 experiences (Prahalad and Ramaswamy, 2000) as well as interactive, creative and social
52 processes (Roser et al., 2013).

7
8 Within this study, the authors have attempted to clarify the dynamic processes and
9 narratives that take place at the co-creation stage using the social media network
10 Instagram as a platform. The article intends to show how the brand TOMS and its
11 stakeholders work collaboratively towards the co-creation and joint development of the
12 brand's identity. It also aims to demonstrate how this leads to an increase of the
13 effectiveness of a brand's communication campaign.
14

17

20 TOMS' ONE FOR ONE

21
22
23 TOMS Giving Report (2015) states clearly the brand's value proposition “We make
24 shoes and eyewear, but really we're in business to help change lives”² (TOMS Giving
25 Report, 2013).
26

27 TOMS initiated its One-for-One[®] giving model initially through its footwear offer;
28 donating one pair of shoes for each pair bought, and has added other product categories to
29 further expand this model. In the absence of high profile advertising campaigns TOMS
30 relies on its community of consumers and “fans” to spread the word of its fashion
31 philanthropy through its in-store community message-boards, at creative charitable events
32 and via its website. Thus TOMS is differentiated and derives brand value through its
33 ethical and sustainable practices, collaborations and co-creations and community-
34 building both with its global network of giving partners and those who receive its charity,
35 but also with its brand community who engage with the brand by driving the brand
36 storytelling and sharing this through social media.
37
38
39
40
41

42
43 TOMS' business model of social entrepreneurship ~~has~~ succeeded in passing its initial
44 target of donating 10,000 pairs of shoes in the first year of operation, and by June 2013
45 over 10m pairs of shoes had been donated, with estimated revenues of over \$250m for the
46 TOMS brand which has also expanded its product and charitable offer to include eyewear
47 and apparel (Amed ~~&~~ and Kansara, 2013).

LITERATURE REVIEW

Value co-creation

Value can be defined as the “capacity of goods, services or activity to satisfy a need or provide a benefit to a person or legal entity” ~~according to (Haksever, et al (2004:292), Chaganti & Cook, 2004, p.292).~~

~~For the authors,~~ The successful creation, communication and delivery of such value ~~resume-represents~~ the primary goal of any company.

We have seen a shift in the bargaining power in favour of the customers ~~(Zwass, 2010)~~ and an acceleration of the role of the consumer as an active player in value co-creation adding efficiency and effectiveness to the value co-creation process (Zwass, 2010).

One of the pioneer works in the co-creation space dates back to 2000, when Prahalad and Ramaswamy defined value as experiences and push companies to see value the same way. Thus, co-creation emerged as a new business paradigm with customers actively participating in the production and marketing process (Pralhad and Ramaswamy, 2004a). Ramaswamy and Gouillart (2010) suggest that value is increased when customers work together to create value, rather than creating value inside the business, due to the fact that customers want to feel a sense of freedom in their interaction. By taking part in co-creation, value is created for both the consumer and the company. ~~This was reinforced by Prahalad and Ramaswamy (2004a, p.6) who that acknowledge the shift: – “Consumers now seek to exercise their influence in every part of the business system. Armed with new tools and dissatisfied with available choices, consumers want to interact with firms and thereby “co-create” value” (Pralhad and Ramaswamy, 2004, p. 6).~~

Co-creation has been defined from different perspectives in the literature, with elements of parity spanning across those definitions – co-creation involves an effort between multiple stakeholders to co-create value/an experience collaboratively (Minkiewicz, ~~Evans and Bridson et al, 2014)~~ ~~and as well as~~ an opportunity for on-going interaction (Ind and Coates, 2013).

The value creation process is being challenged by this changing relationship between consumers and companies. Whereas the traditional value creation formula places consumers outside of the process, holding distinct roles of production and consumption,

5
6
7 consumers now are equipped to extract and create value. However, in order for co-
8 creation to happen, a consumer needs to be an active player in the creation of the
9 experience (Prahalad & Ramaswamy, 2004b) and this co-creation appears as a function of
10 interaction (Gronroos and Voima, 2013). Therefore, analysing consumers' roles as co-
11 creators is essential to understand this process better (Gronroos and Ravald, 2011)

12 A review of the definitions of co-creation of value is shown below (Table 91).

13 Some authors have attempted to conceptualise the building blocks of co-creation, with
14 Prahalad and Ramaswamy (2004b) addressing it in terms of the DART model - Dialogue,
15 Access, Risk-benefits and Transparency. This model implies that dialogue is the
16 conversation between customers and companies and suggests interactivity, engagement
17 and action on both sides is only possible if there is transparency of information. Brands
18 need to have a personalised understanding of risk-benefits in order for the relationship to
19 be beneficial for the consumer (Prahalad and Ramaswamy, 2004, p. 9b) and when both
20 parties collaborate in co-creation the market becomes a process of co-created experiences
21 of unique value, benefitting both the company and the consumer (Prahalad and
22 Ramaswamy, 2004b, p. 11).

23
24
25
26
27
28
29
30
31
32 The value created in the interaction with stakeholders is the sum of sharing resources,
33 knowledge, and technology and by involving the end-user in the process of value creation,
34 unique value is created and experiences co-created. (Prahalad and Ramaswamy, 2004b)

35 Value is explored on the perspective of being a function of experiences (Ramaswamy,
36 2011) and therefore derived from the co-created experience, aligning with Holbrook's
37 (2006) perspective that interactions are the source of experiences. This links to a concept
38 explored by Hagel (2013) that defines this collaborative discussion as "brand narrative"
39 and mentioning that "the problem with stories is that they end, they lack participation
40 and that's where narrative comes in". Brand narratives can be defined as the
41 process of that communicating life and how sees consumers organise their brand-related
42 experiences in the forms of narratives, narratology, becoming an influential thread as well
43 as systems of communication in various contexts (Luedicke and Giesler, 2008, p. 419).

44 Narratives have a potential to engage consumers with brands as consumers can co-create
45 the brand.

McAlexander, 1995) and for that reason brands can co-create with consumers and give consumers control to enhance emotional attachment with brands (Rucker et al., 2012). By participating in the brand's experience, users assist the brand in their pursuit of goals and visions, concurring with White ~~et al's, Hede, and Rentschler~~ (2009) perspective where value creation occurs when consumers actively participate in the performance of one or more activities performed throughout the consumption experience.

Formatted: Not Highlight

Brodie et al. (2011, 260) define customer engagement as "a psychological state that occurs by virtue of interactive, co-creative customer experiences with a focal agent/_object. It is a multi-dimensional concept subject to a context and/ or stakeholder specific expression or relevant cognitive, emotional and/ or behavioural dimensions" ~~(p. 260)~~.

Formatted: Not Highlight

Engagement is therefore considered a process and the consumption experience is looked at as the object. It is essential that to achieve this emotional immersion, users possess a personal relevance and connection to the experience, triggered by interaction where stories and experiences are shared. Consumer engagement can be ~~defined-defined~~ as the behavioural manifestation from a customer towards a brand that goes beyond ~~purchase transactions, results from motivational drivers behavior (Van Doorn, 2010)~~ and represents the way a brand connects with consumers and type of relationships it establishes ~~(Van Doorn et al. 2010)~~. ~~Customer-Engagement~~ enables consumers to co-create value with the brand through the relational exchanges and bonds they establish with them (Sashi, 2012). When consumers are engaged they are more likely to recommend products to others and participate in user-generated content that will add value to the brand, expanding on their traditional role through co-creation of value process and becoming advocates for the brand. This type of involvement culminates in higher loyalty over the long term (Oliver, 1997). Through understanding consumers and their attitudes towards brands, marketers are able to build and effectively manage brand equity, thus leading to changes in their marketing activities (Keller, 1998).

The role of online and digital communication strategies

Brands ~~are have~~ ~~shifting~~ their focus from traditional forms of media to online and digital media like social networking sites and viral marketing (Hutton and Fosdick, 2011) to allow for more interactive opportunities to occur. Social platforms ~~have given~~ brands wide possibilities for reaching potential customers,

1
2
3
4
5
6
7 communication and collaboration, and creating values to customers- (Carlson and Lee,
8 2015). Being able to use social media and social networking effectively is paving the way
9 for a new generation of marketing and customer relationship management to occur.

10
11
12
13
14 Meadows-Klue (2008:250) said “the explosion of social media since 2005 is the starkest
15 of reminders about how fast the tools of the digital networked society continue to unfold”,
16 leading to a new paradigm of communication and branding in the digital age. Brands have
17 shifted from a traditional one-to-many approach to a one-to-one (Cvijikj and
18 Michahelles, 2011) allowing them to connect with their existing consumers in new ways.
19 Social media allows for more connectivity and opportunities to build long lasting and
20 solid relationships between brands and consumers. As referred to by Fader and Winer
21 (2012) the growth of social networking has resulted in user-generated content (UGC) –
22 that can be described as product reviews, descriptions of products, usage, and consumer
23 created advertising, and blogs, as well as all other consumer generated material. This
24 change in relationship has affected and altered customer’s interaction with a brand (Singh
25 and Sonnenburg, 2012) – consumer’s change from a passive to an active participant in the
26 brand creation process and thus become co-creators of value.

27
28
29
30
31
32
33
34 As part of a digital communication strategy, there are specific online communication tools
35 that marketers can employ in planning: search engine marketing, online PR, online
36 partnerships, display advertising, opt-in email marketing and social media marketing-
37 (Chaffey and Smith, 2008).

38
39
40 This last one - encompassing viral marketing and online word of mouth - is the one we’ve
41 the authors considered in this analysis as a preferred method of engaging and reaching the
42 audience – one where content and messages narratives are shared and forwarded to
43 achieve awareness for the brand.

44
45
46 Word of mouth (WOM) marketing builds active and mutually beneficial consumer to
47 consumer (C2C) and consumer to brand (C2B) relationships

48 (www.womma.org/wom101). Its techniques are based on a two-way dialogue and
49 transparent communications, looking at educating people about the brand and its products,
50 providing tools to make the sharing of information easier as well as listening and
51 responding to supporters.

52
53
54 Kiss and Bichler (2008) define viral marketing as “marketing techniques that use social

Field Code Changed

1
2
3
4
5
6
7 networks to produce increases in brand awareness through self-replicating viral diffusion
8 of messages, analogous to the spread of pathological and computer viruses.”

9
10 Viral marketing campaigns targeting new customers are likely to be more ~~loyal~~
11 ~~andsuccessful and~~, therefore, ~~more lead to higher loyalty profitable~~ than ~~those where~~
12 customers ~~are~~ acquired through ~~regular-traditional~~ marketing investments (Trusov ~~et al~~,
13 ~~Bueklin, and Pauwels~~ 2009). Viral marketing is a cost-effective marketing strategy that
14 drives sales and facilitates interconnection ~~between~~ brands and consumers (Dobele et al.,
15 2007).

16
17
18 To take full advantage of such benefits, brands should start and participate in customer~~2's~~
19 conversations (Chaffey and Ellis-Chadwick, ~~2013~~2012).

20
21 One of the most efficient platforms to do so is Instagram.

22
23
24 Instagram is a social network platform for sharing photos and videos on mobile devices
25 with other users/ followers where each user can “like” each other’s photos and comment
26 on them. The platform was launched in October 2010 by Kevin Systrom and Mike
27 Krieger and named App of the Year by Apple in 2011 (Goor, ~~2015~~2012). Users use
28 hashtags (#) to caption a particular topic that others ~~users~~ can use to search ~~for~~. They can
29 also tag with “@” to link that image to the profile of a user. Platforms such as Instagram
30 are allowing brands to uncover consumers’ drivers and giving them deeper understanding
31 of what moves them, by allowing ~~brands-these brands~~ to directly communicate with their
32 consumers and listen to them.

33
34
35
36
37 Backed up by the continuous growth in social media usage across the world, with active
38 user accounts now equating to roughly 29% of the world’s population (We are social,
39 2015) Instagram has proven to be a very effective way of connecting brands and
40 consumers with 53% of Instagram users following their favorite brands, more than any of
41 the other main social platforms (Weise, 2015). More than 90% of the 150 million people
42 on Instagram are under the age of 35, making it an attractive platform for fashion,
43 entertainment and media brands focused on the 18- to 34-~~year-old~~ age consumer
44 (Mancuso and Stuth, 2015).

45
46
47 Brands that target a younger generation are more likely to succeed on Instagram due to
48 the demographic profile of its users with female consumers ~~were found to be~~ amongst the
49 key users of the platform (Smith, 2014). As they are more prone to impulse purchasing
50 due to connection to brands and beliefs (Hassan, 2014), they are more ~~prone-likely~~ to
51 respond to campaigns on ~~Instagram~~this platform.

11
12 Brands use Instagram not only to reach consumers, ~~but~~but also to convert these into brand
13 advocates (Beltrone, 2012). The brand advocacy that they strive to achieve ~~through~~
14 ~~Instagram~~ is highly effective, communicating a message and affecting customer's
15 perception of the brand and its products. According to Goor (2012), the conveying of a
16 brand's identity on their feed, through using the brand colours and depicting brand-related
17 people and events, increases user engagement and also helps consumers to better perceive
18 a brand and its message when it comes to purchasing (Langton, 2011). The use of image
19 as opposed to mere text enables higher levels of engagement with consumers and also
20 leads to more interactions than other types of content (Soonius, 2012). According to Goor
21 (2012~~5~~) brands primarily use two strategies on Instagram: an emotion strategy and a
22 symbolism strategy. The first one concentrates on influencing affective beliefs, when a
23 brand is associated with emotions felt when using the product and ~~the second symbolism~~
24 ~~strategy~~ is applied when a brand needs to convey a certain identity or lifestyle, where
25 ~~re~~ the focus is on the brand's image.
26

27
28 Coursaris (2013) has developed a framework that looks to divide social media marketing
29 messages into seven categories. On one of those categories – engagement - the author has
30 identified eight subcategories ~~for engagement~~: assistance, community, likes,
31 photos/videos, polls, questions, appreciation and directional. ~~This will be developed later~~
32 ~~in this paper as key concepts~~. This specific study was developed concentrating solely on
33 the Facebook social network site, however ~~it~~ intends to bring value to other social media
34 marketing communications platforms as well ~~as through working~~ as a tool to better
35 understand the range of messaging strategies and ~~work as an~~ analytical tool for assessing
36 the nature of engagement associated with each strategy and category (Coursaris, 2013).
37 The goal is to understand the categories that trigger the highest and most positive
38 engagement amongst consumers so that brands can more accurately plan and implement
39 future ~~s~~Social ~~m~~Media strategies.
40

41
42 The seven categories and corresponding subcategories are displayed below (Table 02).
43
44

For Peer Review

METHODOLOGY

The aim of the present study is to more fully understand the complex dynamic processes that underpin the co-creation of brand identity through a qualitative case study of the TOMS brand, to uncover the decisions, processes and activities as evidenced in an exploration of a contemporary fashion business situation. The rationale behind our selection of the case study method is that this approach does not attempt to define a fixed set of dimensions or a management 'tool box' for co-creation, rather the research aim is enabled i.e. to uncover how co-creation works in practice, to answer the central question driving this research: what are the actions and influences of the various stakeholders involved in this specific brand? In this application the case study research approach aims to uncover detailed knowledge about the operations and experiences of one particular situation (Kvale, 1996; Punch, 2000) in order to inform understandings of the wider population to which this specific case belongs (Gummesson, 2005; Wolcott, 1994). According to Gummesson (2005) a qualitative approach to business research recognises the complexity of business entities and enables the interrogation of the influence of assorted variables through an iterative investigation of multiple data sources. In this study brand identity is conceived as a dynamic negotiated social process and thus investigating the situated concept of co-creation necessitates the exploration of multiple stakeholders' contributions to the brand identity. The interpretative practices of the researchers are recognised as fundamental to a qualitative research approach which seeks to explore implicit meanings (Denzin ~~& and~~ Lincoln, 2000) and in choosing a qualitative approach to explore the practice of co-creation of fashion brands, the researchers hope to penetrate ~~“the complex and the elusive”~~ practices involved, over a desire to claim any unambiguous causal relationships between variables (Gummesson, 2005: 312).

The case study approach utilised in this study is primarily inductive with data drawn from multiple ~~“real world”~~ sources (Gummesson, 2005:322) and in line with inductive qualitative research practice this case study comprises research data drawn from a variety of sources ~~which that~~ reveal not only the corporate branding strategy as embodied in the management vision, but also the company's internal culture and its external image (Hatch ~~& and~~ Schultz, 2001).

Formatted: Not Highlight

1
2
3
4
5
6
7 A full media review was undertaken in order to answer the research questions and a series
8 of qualitative semi-structured interviews were conducted with key informants including
9 marketing and retail managers and store workers in the UK and Amsterdam (where
10 TOMS has its European HQ). These eight interviews were transcribed and coded to
11 develop themes, which inform the discussion. These themes were filtered according to
12 relevance and ultimately the researchers focused on the ones that related to digital media
13 strategies as well as consumer engagement as a way to reinforce this research.

14
15
16 To supplement the media review and inform research into the brand's external image and
17 co-creation activities of its consumers' content analysis of the brand's social media
18 platforms was carried out.

19
20
21 Also, as the focus of this research is not on what consumers say they do but rather on how
22 they contribute to the TOMS' brand identity through their interactions, researchers carried
23 out discourse analysis of the brand's social media platforms. To achieve this goal, content
24 analysis was conducted on the social network Instagram. Content analysis can be defined
25 as "a research technique for the objective, systematic and quantitative description of the
26 manifest content of communication" as well as a "technique for making inferences by
27 objectively and systematically identifying specified characteristics of messages"
28 according to (Bryman, 2001, p. 178).
29

Formatted: Not Highlight

30
31
32
33
34 The research used qualitative analysis to the data in line with the methods of summative
35 content analysis, moving beyond quantifying data and seeking to develop meanings
36 through interpretation (Hsieh ~~& et Shannon Shannon, Mayring, 2000~~2005)

Formatted: Not Highlight

37
38 To reduce the likelihood of researcher or informant, triangulation between and across the
39 multiple data sources was employed in order to define research themes and to establish
40 the convergence of the data results (Saunders ~~et al. Lewis & Thornhill~~, 2009).

41
42
43
44 Regarding the scope of research, 360 posts using the #withoutshoes were analyzed
45 directly on the Instagram social network site for the content analysis in order to examine
46 the characteristics of the campaign and users' participation.

47
48 The data was gathered during the week following the end date of the campaign. ~~We~~
49 ~~used~~ an equal number of posts from each country's official TOMS's Instagram
50 accounts was used (12 in total), selecting the top 30 in popularity, identified by number of
51 likes.
52
53
54
55
56
57
58
59
60

1
2
3
4
5
6
7 To get a realistic picture of how the brand was engaging with consumers and vice versa,
8 data resulting from the analysis of all pictures was coded in an analytical grid, which took
9 into account the complexity of digital tools and their different types of media.
10

11
12 The framework developed emerged as a way of explaining the data and clarifying the
13 different interactions that took place between the brand and consumers, as well as the
14 rationale behind the dialogue and exchange of value taking place.
15

16
17 It intends to clarify how social media practices can influence the co-creation of value.

18 Using Brodie et al (2013) framework of online engagement, we have looked at five
19 crucial processes to initiate consumer engagement: sharing, co-developing, socializing,
20 advocating and learning. The authors use consumer loyalty, satisfaction, empowerment,
21 connection, commitment and trust to trigger engagement between brands and consumers.
22

23
24 By mapping out these concepts with the ones emerging from our analysis, we were able to
25 further add to this model by integrating the actions needed (“likes”, “comments” and
26 “send to”) as well as the types of media (photos and videos).
27

28 The rise of the code “community” was the central piece of this framework as we found
29 ~~out~~ it acts as the glue that puts all these elements and interactions in place.

DISCUSSION

Defining how stakeholders co-create value with a brand is essential to fully understand the role that social network platforms play in engaging with consumers.

The concept of value has evolved over time, ranging from functional, utilitarian, perceived value, value for customer, value chain concept, relationship value, superior value and lately co-created value (Agrawala, A.K., Kaushik, A.K. and Rahmane et al., Z., 2015) and for this reason it is important to understand how brands with sustainable and ethical practices use value in its own terms. Understanding how social media can play a key role in communicating and creating a dialogue with all stakeholders is key to understanding the value co-creation process. (Edvardsson et al., 2011) According to Muniz and O'Guinn (2001:413)

Consumers deeply involved with a brand that offers them emotional and symbolic benefits develop "a common understanding of a shared identity" (Muniz and O'Guinn, 2001, p. 413) and for that reason they are more likely to engage in new product development and experience sharing. (Ouwersloot and Oderkerken-Schroder, 2008)

Figure 01 represents the developed model applied to the #withoutshoes campaign and illustrates the process of co-creating value with the consumers through an Instagram campaign.

Figure 01: TOMS Value Co-Creation process (Adapted from Brodie et al., 2013)

Formatted: Not Highlight

The campaign entitled “One day without shoes” took place on 21st May 2015. For the two weeks ahead of the day, TOMS were determined to raise awareness for children’s health and education by challenging consumers to post a photo of their bare feet. For every photo tagged on Instagram, the brand would give a new pair of shoes to a child in need (TOMS, 2015). This campaign addresses the purposes of brand advocacy as stated by Beltrone (2012) where the effectiveness of an Instagram campaign is increased through powerful narratives and leads to highly positive consumer perception and awareness of the brand in question. In line with this, Mycoskie (2015) clarifies:

“This year’s One Day Without Shoes will be different than any we’ve ever done. We’re extending the timeframe to build awareness and anticipation, but most importantly, so that more people can participate in an effort to give more. The best part is that even if someone is not a TOMS customer, he or she can simply take a photo and post #withoutshoes to make sure a child in need somewhere in the world will get a new pair.” (Mycoskie, 2015)

Formatted: Indent: Left: 0.5"

The framework used to analyse the campaign has its key elements in the five crucial processes as defined by Brodie et al (2013): sharing, co-developing, socialising, advocating and learning.

All five elements play an equal part in this dynamic interaction between a brand and the

consumer. For the purpose of ~~our~~this analysis, ~~the authors~~ we will start with the learning process.

Learning

A brand can differentiate itself by creating a unique customer narrative and by doing that “companies can greatly improve their ability to retain customers, target key customers segments and enhance network profitability” ~~(according to~~ Vincent ~~(~~2000:~~;~~~~p~~25).

Having a business model built on philanthropy has given TOMS a competitive advantage in a variety of ways: with its giving partners; with other industry collaborators who appreciate the halo effect of their partnerships; with its conscious consumers whose commitment to social entrepreneurship drives sales ~~and~~; with TOMS’ employees who feel good about working in social entrepreneurship as part of the TOMS ~~“~~family~~”~~.

These internal and external stakeholders represent the driving force behind the brand and were one of the key drivers ~~of the campaign, for instance in to~~organizinge walks during the #withoutshoes day and sharinge the brand’s values with the community. ~~These~~ groups of stakeholders include employees, managers, suppliers, influencers (e.g. media) and overall consumers. Through a meaningful two-way dialogue they recognized the brand’s actions, perceived them as consistent with their own through a common cause and shared values. The narrative created allowed TOMS to experienced a positive feedback loop of outcomes that enabled them to pursue their purposes more profitably, with greater support and more effectively. This aspect was reinforced by the interviews conducted with members of the TOMS brand:

“I think people that like TOMS and follow TOMS they are socially aware and that’s why they like TOMS - you know we’re able to give back and that means that they give something back by purchasing the shoes, they’re part of it. (...) Social media allows us to provide updates to our customers so they’re part of it (the brand’s activities and giving actions).”(Interviewee TOMS, 2015)

As such, stakeholders ~~They~~ were key components in the learning process and through a method of “storytelling” were able to spread the message and inform ~~consumers~~ about the

Formatted: Left, Indent: Left: 0.5", Widow/Orphan control, Adjust space between Latin and Asian text, Adjust space between Asian text and numbers

Formatted: Font: Not Italic

TOMS' brand values, mission and vision. The interviews concluded that these values and the brand's story are always a central piece of communication to the brand. According to one of the interviewees in this study “

“Our main thing is the story comes before the product. (---) We are about getting the story out there to our customers, to give them as much information as we can”
(Interviewee TOMS, 2015)

Sharing

As Funk (2009) suggested, (2009)-social media will not sell products but it will help increase digital presence and create stronger relationships with customers to increase brand value.

This dialogue can be seen in how consumers share ~~each~~ posts with their peers.

There is a tendency towards a participatory culture in which people aim to “contribute to their world's and organizations' search for consumer sight” as informed by Ind et al (2013:6) and in fact, additional academic studies confirm that consumers feel more intimate, positive and creative to brands after starting being more involved in brands' communities. Similar to consumers, brands are ~~the~~ extremely interested in achieving a high level of ~~customer~~ engagement, which usually results in “an intimate long-term relationship with the customer” according to (Sashi (-2012:-p.254). In this campaign, photos are always accompanied by a mention to the campaign hashtag# as well as with aa short description and reference to brand related people. An interesting finding was that photos with higher levels of creativity tend to be liked and shared the most. Stakeholders participating in the campaign used it as a way to express their beliefs and did so by creating images that visually translate the purpose of the campaign.

Through the use of “likes”, “comments” and “send to” functions, consumers then post their photos using the social network site.

Sharing then leads to co-developing using through user-generated content (UGC). The fact that consumers' stories are part of this viral marketing strategy was also mentioned in the interviews:-

1
2
3
4
5
6
7
8 “Social media’s strength is the accessibility of its word of mouth and the fact that it
9 empowers others to share stories.” (Interviewee TOMS, 2015).

10
11
12 One of the strengths of the campaign lies in the fact that TOMS starts and participates in
13 customer’s conversations through publishing these photos on their official feed. This is in
14 line with Dobele et al (2007) perspective that viral marketing is a cost-effective marketing
15 strategy that facilitates the interconnections between a brand and its consumers.

21 Co-developing

22
23
24 By relying on UGC, the brand is able to establish a strong sense of community. Users
25 tend to use elements of the brand in order to allow for more correct identification and
26 immediate recognition of the brand in the photos and videos posted. As stated by Goor
27 (2012) the use of brand colours as well as

28
29 brand-related people and events, helps consumers to better perceive a brand and its
30 message. By using images as opposed to only text, levels of engagement are higher
31 (Soonius, 2012) and allow for increased interaction. The majority of photos posted
32 through the #withoutshoes campaign feature the TOMS actual shoes, the brand’s flag, the
33 blue colour and other recognizable brand elements.

34
35
36
37
38 Instagram has facilitated the conversation between TOMS and its target audience thanks
39 to the interactive nature of the platform and social media in general (Pickton and
40 Broderick, 2001; Sashi, 2012; Ubeda et al., 2013). Instead of being passive recipients of
41 brand information, customers that are engaging with brands can make active contributions
42 to these interactions (Hollebeck, 2011) and use technology as a way to reach a level of
43 exposure and customer engagement well beyond what was previously possible (Belch and
44 Belch, 2012). This c

45
46
47 o-developing leads to socializing through the element of experience.

48
49
50
51 ~~TOMS actual shoes, the brand’s flag, colors and other recognizable brand elements were~~
52 ~~used at this stage.~~

Formatted: Font: Not Italic

1
2
3
4
5
6
7 Co-developing then leads to socializing using experience.

8 **Socializing**

9
10
11 Social media platforms have the power to develop a meaningful connection and provoke
12 conversation with actively engaged audiences (Hermida et al., 2012) as well as facilitate
13 the formation of brand communities (Muñiz and O'Guinn, 2001; Muñiz and Schau, 2005).

14 Since brand communities' member shared common beliefs, this generates a bond (De
15 Valck et al., 2009) and increases consumer feelings of empowerment (Cova and Pace,
16 2006). Brands that co-create with consumers, give them an emotional attachment and the
17 ability to participate in a unique experience. As clarified by the interviews conducted,
18 value creation occurs through:

19
20
21
22
23
24
25
26 *"Building and helping to build a community. (...) It is about bringing likeminded*
27 *people in. Whatever it is, it's about them sharing something and it's working*
28 *really well. It's creating a really close community around TOMS."* (Interviewee
29 TOMS, 2015)

30
31
32
33 The socialization process is enhanced through the use of "likes", "comments" and "send
34 to" functions, allowing for a quick spread of the message. Stakeholders are able to quickly
35 extend the reach of the community through this social platform.

36
37
38
39 TOMS has different Instagram profiles according to the countries in which it is present,
40 however the official account for TOMS was the one that gathered all photos and
41 generated the highest traffic: on average, each photo posted had a total of 13,830 likes.

42
43 The benefits of social media was addressed in the interviews:

44
45
46
47
48
49
50
51 *"We are a completely different business model, we don't use the same marketing*
52 *budgets. (...) Social media is quite a quick evolution and it's so important and so*
53 *influential and so cost effective as a marketing tool. You're reaching millions of*
54 *people from what can be a very small spend as a brand."* (Interviewee TOMS,
55 2015)

56
57
58
59
60
To further extend the benefits of this platform, Instagram was confirmed in the interviews

Formatted: Space After: 0 pt,
Widow/Orphan control

Formatted: Font: Not Italic

Formatted: Space After: 0 pt,

Formatted: Font: Not Italic

conducted as the tool that allows for such a campaign to be truly global:

“One Day Without Shoes is a global initiative. (It has) fantastic interactive potential with customers and we get a massive reach into the millions just via digital media.” (Interviewee TOMS, 2015).

Formatted: Font: Not Italic

Formatted: Indent: Left: 0"

Formatted: Font: Not Italic

Advocating

Consumers' role and their increasing importance as brand ambassadors, co-creators of innovative products and active participants in their favourite companies make them a key player – they are becoming not only the consumer, but the producer, a supplier, a seller, and a style manager (Fashion Futures, 2010).

Brand advocacy and collaboration ~~amongst its elements leads~~ emerges from the formation of communities, ~~formed out of a shared interest in the brand~~ (Algesheimer et al., 2005) as discussed above. ~~For brand communities to emerge, brands need to have a clear and strong positioning and a target consumer base that strongly identifies with the brand.~~ These consumers are defined by the brands they choose (Muniz and Hamer, 2001), leading to the process of social categorization and to the establishment of membership in resulting social groups.

Through a process of generating awareness, they then continue the circle educating and further learning about the brand at stake. The advocating journey was confirmed at the interviews:

“Once one person knows the story properly, they tell someone else and so each person becomes almost like a brand ambassador themselves and that's the success of TOMS - is that people are engaged with the story and they spread the story. It's quite a simple one really. It's very powerful.” (Interviewee TOMS, 2015)

Formatted: Indent: Left: 0.5"

Formatted: Font: Italic

Formatted: Font: Italic

Formatted: Font: Italic

Advocacy isn't, however, the campaign's main goal.

Formatted: Widow/Orphan control, Adjust space between Latin and Asian text, Adjust space between Asian text and numbers

Formatted: (Asian) Japanese, (Other) English (U.K.)

The TOMS brand has different profiles according to the countries in which it is present,

1
2
3
4
5
6
7 however the official account for TOMS was the one that gathered all photos and
8 generated the highest traffic: on average, each photo posted had a total of 13.830 likes.
9

10
11 Instagram appears as the tool that allows a campaign like this to be truly global.

12 According to TOMS founder Mycoskie (2015) the #withoutshoes campaign was not just
13 about advocacy and giving based on buying, but based on real giving for giving's sake. In
14 fact, every country where the brand has a presence and that were the object of this study,
15 has adhered to the campaign, using Instagram to promote the activities held during the
16 day and campaign timeframe. By doing so, a

17
18
19
20
21 -At the end of the campaign, the brand was able to donate a total of 296,243 shoes and has
22 successfully shared this using the same platform. As stated by Mycoskie (2012, p187)
23 "TOMS' success is not the result of an idea, but a community of people who believe in
24 the power of giving".
25

26
27 This reinforces Mycoskie's vision on the power of positive customer brand endorsement
28 "My customers are my biggest evangelists" (Binkley, 2010). Customers are immensely
29 attracted by values and meanings; it is not about the utility or quality of a particular item,
30 but about that story behind it.
31

32
33 Giving is the fundamental story that supports the TOMS brand and Mycoskie (2012:37)
34 reveals reveals, "We spend every day thinking about new ways to spread our story"
35 (Mycoskie, 2012, p37). This engagement can be defined as a combination of both rational
36 and emotional bonds.
37
38
39
40
41

42
43
44 Through a two way narrative, redirecting focus from the brand to the consumer, the
45 dialogue shared on Instagram allows for a mutually beneficial process to occur between
46 brands and consumers.
47

48 Relationship building is built on the premises of both an emotional and symbolic strategy
49 with the TOMS brand, feeling of empowerment for doing good and participating in a
50 common cause as well as trust and commitment to the brand that the notion of brand
51 community creates and develops.

For Peer Review

-CONCLUSION

With the proliferation of social networks, the dynamic between brand and consumers has changed, though allowing the consumer to actively participate in the construction of the brand identity, bringing the brand closer to the consumer. Through co-creating with the community, the consumers become an active stakeholder, both in the interaction and in the context. At this stage, value creation takes place through the interaction and experience of creating unique products.

Formatted: No widow/orphan control, Don't adjust space between Latin and Asian text, Don't adjust space between Asian text and numbers

Collaboration and relationship building are seen as sources of value and one of the premises on which this is built is the belief that by sharing experiences, all the individuals involved acquire a greater understanding of what is happening on the other side of every interaction, enabling them to devise a new and better experience for both sides. (Pralhad and Ramaswamy, 2014a)

Formatted

As well as ethical and sustainability issues, consumers are increasingly interested in brand stories and the dynamic relationship between brands and consumers is of growing importance to the analysis of the brand experience, with consumers increasingly seeking full immersion in unique contexts and experiences which confirm the meanings, cultures, symbols and identities behind their chosen brands.

Formatted: Not Highlight

Formatted: Left, Adjust space between Latin and Asian text, Adjust space between Asian text and numbers

This analysis of TOMS' key annual marketing event has shown the power of brands to leverage social media enabled co-creation in ways that were not previously possible and ~~that~~ to an extent ~~that~~ could not have been imagined. The effective and dynamic use of Instagram facilitated ~~ds consumers and producers~~ consumers to join joining together in brand communities and assume a key role in the creation of the brand's narrative. Through a joint and focused effort, both brand and corresponding stakeholders worked collaboratively to co-create the value, shape TOMS' message and reach a common campaign goal. As one can see by the data collected, the use of Instagram has allowed for higher levels of engagement, shared ownership of the brand and increased effectiveness of the , which add value for all participants. #withoutshoes campaign.

Formatted: Justified, Don't adjust space between Latin and Asian text, Don't adjust space between Asian text and numbers

The connection of design and marketing is evident in how the campaign is supported and how it makes use of the brand's visual components as a key strategic tool to allow for the sharing and advocacy of the message. In sum, building brand excellence in the fashion business can be done through creating lasting and meaningful stakeholder value. For a brand to succeed in today's competitive landscape it needs to stretch beyond short-term results and have a purpose beyond pure profit. A successful brand that engages effectively with consumers and derives trust, commitment and emotional responses is grounded in creating long-lasting social and economic value for all its stakeholders and by doing so, maintains its relevancy and drives growth as well as loyal consumers.

Formatted

Reflecting upon implications of this study from a managerial perspective, one can say that marketing strategies using digital platforms need to generate an environment of trust that enables participation to happen as well as a sense of creativity through the use and sharing of brand values.

Formatted: Font color: Auto

Formatted: Font color: Auto

It is a brand's task to develop platforms and mechanisms to enable consumers to contribute effectively (Ind et al., 2013). Interactions need to be designed having tasks, platforms, tools and media in mind and allowing for interaction within the brand community.

Formatted: No widow/orphan control, Don't adjust space between Latin and Asian text, Don't adjust space between Asian text and numbers

Formatted: Font color: Auto

Formatted: Font color: Auto

Formatted: Font color: Auto, English (U.S.)

As for academic implications, this study has shown the need for further theoretical developments to take place, if co-creation theory is to be embedded further into the marketing literature. Also, the need to focus on Instagram, its processes, tools and evaluation techniques as a preferential tool of a brand's marketing strategy is another recommendation arising from this study

Formatted: Font: Times, 12 pt, Font color: Auto

~~Interactions need to be designed having tasks, platforms, tools and mediums in mind and allowing for interaction within the brand community.~~

Formatted: Font color: Auto

~~Brand value co-creation takes place when all these aspects and is reinforced by the meanings it creates through matching brand and consumer behaviors.~~

For Peer Review

1996	Kambil et al.	Value co-creation by emphasizing the role of customers in business strategy and marketing
1996	Wikstrom	A company-consumer interaction (social exchange) for the purpose of attaining added value.
2000	Prahalad and Ramaswamy	Co-creation of personalized experiences with the customers
2004	Prahalad and Ramaswamy	The consumer and the firm are intimately involved in jointly creating value that is unique to the individual consumer... the interaction between the consumers and firms becomes the new locus of co-creation of value
2006	Lusch and Vargo	Value can only be co-created with and determined by the user in the consumption process and through use or what is referred to as value-in-use
2008	Payne et al.	A process where the supplier creates superior value propositions, with customers equaling value to when a good or service is consumed.
2008	Xie et al.	Rise of prosumption as value creation activities undertaken by the consumer that result in the production of products they eventually consume and that become their consumption experiences.
2010	Gummesson & Mele	Co-creation is enabled by Actor to Actor (A2A) involvement and commitment. It is a time-based process which comprises parallel and sequential phases simultaneously.
2011	Prebesen and Foss	The consumer taking an active part in consuming and producing value within their experience
2011	Ramaswamy	The process by which mutual value is expanded together, where value to participating individual is a function of their experiences
2011	Edvardsson et al.	Shaped by social forces, is reproduced in social structures and can be asymmetric for the actors involved
2012	McColl-Kennedy et al.	Benefit realized from integration of resources through activities and interactions with collaborators in the customer's service network
2012	Gronroos	A joint collaborative activity by parties involved in direct interactions, aiming to contribute to the value that emerges for one or both parties.
2013	Roser et al.	An interactive, creative and social process between stakeholders that is initiated by the firm at different stages of the value creation process.
2013	Ind and Coates	A process that provides an opportunity for on-going interaction, where the organization is willing to share its world with external stakeholders and can generate in return the insight that can be derived from their engagement.
2013	Gronroos and Voima	Customers' creation of value-in-use where co-creation is a function of interaction.
2014	Fadil	Creation and delivery of richer experiences to stakeholders as a part of the process along with tangible outcomes.

Table 1. Definitions of value co-creation

Brand awareness Posts that build company presence and attentiveness in digital consumer market	<i>Promotions</i>	Posts that contain the use of celebrity and/or event sponsorship which mentions brand's name
	<i>Heritage</i>	Posts that seek to bring consumer into company's history; trivia and employee spotlights
	<i>Operations</i>	Posts that inform consumers about production processes and behind-the-scenes operations
Corporate Social Responsibility Posts that build a brand image of being involved in supporting and strengthening the community, primarily among socially conscious consumers	<i>Awareness</i>	Posts contain elements that support non-profit organizations and/or raise awareness of causes
	<i>Fundraisers</i>	Posts that showcase support for specific charity fundraisers
Customer Service Posts that aim to build consumer knowledge about product, industry, and brand changes.	<i>Openings</i>	Posts that contain store opening notifications
	<i>Outages</i>	Posts that contain service outage notifications
	<i>PSA</i>	Posts that contain a consumer notice even if it was originally posted by another source
Engagement Posts that build consumer connections/ communities through direct interaction with the brand	<i>Assistance</i>	Posts that include advice, home improvement, cooking, life tips, recipes for the consumer
	<i>Community</i>	Posts that encourage consumers to follow one of the brand's other social media platforms (e.g., Twitter, YouTube)
	<i>Likes</i>	Posts that specifically point consumer to "Like" a message
	<i>Photos/Videos</i>	Posts which direct consumers to look at new photo albums and/or videos posted by the brand
	<i>Polls</i>	Posts that request information or prompts answers from the consumer through multiple-choice questions
	<i>Questions</i>	Posts that request information or prompts answers from the consumer through fill-in-the-blank or open-ended questions
	<i>Appreciation</i>	Posts that recognize and show gratitude for consumer support
Product Awareness All posts which build product knowledge, understanding, and existence.	<i>Name Brands</i>	Posts that mention products sold at the store but are not specifically produced by the posting brand
	<i>House Brands</i>	Posts that mention products sold and produced by the posting brand
Promotional Posts that are designed to stimulate immediate or near future purchases through monetary incentives.	<i>Deal</i>	Posts include some form of instant reward for the consumer to make a purchase, such as discounts, coupons, limited time deals, and one-day specials
	<i>Chance</i>	Posts contain incentives for consumers to make a future purchase by offering a potential reward, such as a contest, giveaway, or sweepstakes
Seasonal Posts that remind and inform consumers of seasonal and annual events and related products by the brand	<i>Holiday</i>	Posts that mention or advertise specific holidays such as Valentine's, Christmas, or New Years
	<i>Season</i>	Posts that reference a climatic or sports season
	<i>Event</i>	Posts that mention significant timely events that are not holidays, such as Graduation, tax day, Daylight Savings, or Spring Break
